

BA Work Platform

BA Work Platform facilitates work in lubrication and work pits. Can be raised and lowered for optimal working position. Work surface in non-slip hot-dip galvanized grid. Fits most pits, available with track widths of 1000–1300 mm.

BA Work Platform is air-hydraulic, which provides smooth raising and lowering.

Stable in all positions as the load rests on a hydraulic cylinder.

Foot pedal operation means that the fitter has both hands free.

Compressed air supply for operation via a spring-loaded hose reel with 12 meters of hose.

Effective air-operated roller brake on two of the wheels and a spring-loaded control lever ensure that the platform is not moved unintentionally.

Shelf for hand tools is standard. As an accessory, the platform can be equipped with a compressed air outlet for e.g. compressed air-operated hand tools.

TECHNICAL DATA:

- Max. load: 250 kg (10 ATÖ)
- Min. height: 153 mm
- Max. height: 500 mm
- Work surface: 1000 x 1000 - 1300 mm
- Weight: 80 kg

Article number: 1308
